This wizard helps you install roles, role services, or features. You determine which roles, role services, or features to install based on the computing needs of your organization, such as sharing documents, or hosting a website.

To remove roles, right services, or features: Start the Remove Roles and Features Wizard

Before you continue, verify that the following tasks have been completed:

- . The Administrator account has a strong password
- . Network settings, such as static IP addresses, are configured
- . The most current security updates from Windows Update are installed

If you must verify that any of the preceding prerequisites have been completed, close the wizard, complete the steps, and then run the wizard again.

To continue, click Next.

Install

Cancel

Active Directory Domain Services requires a DNS server to be installed on the network. If you are
installing a domain controller, you can also install the DNS Server role using Active Directory Domain

Services Installation Wizard by selecting the Active Directory Domain Services role.
