Welcome to the New Virtual Machine Wizard

What type of configuration do you want?

◉ Typical (recommended)

Create a Workstation 17.x virtual machine
in a few easy steps.

◯ Custom (advanced)

Create a virtual machine with advanced
options, such as a SCSI controller type,
virtual disk type and compatibility with
older VMware products.

Guest Operating System Installation

A virtual machine is like a physical computer; it needs an operating
system. How will you install the guest operating system?

Install from:

○ Installer disc:

[No drives available   ⌄]

○ Installer disc image file (iso):

[C:\Users\great computer\Downloads\rhel-9.2-x86_64   ⌄]   [Browse...]

● I will install the operating system later.

The virtual machine will be created with a blank hard disk.

New Virtual Machine Wizard   ✕

Name the Virtual Machine
What name would you like to use for this virtual machine?

Virtual machine name:

WinServer16|

Location:

C:\Users\great computer\Documents\Virtual Machines\WinServe   Browse...

The default location can be changed at Edit > Preferences.

New Virtual Machine Wizard   ✕

Specify Disk Capacity
How large do you want this disk to be?

The virtual machine's hard disk is stored as one or more files on the host computer's
physical disk. These file(s) start small and become larger as you add applications,
files, and data to your virtual machine.

Maximum disk size (GB):   40 ▲▼

Recommended size for Windows Server 2019: 60 GB

○ Store virtual disk as a single file

⦿ Split virtual disk into multiple files

Splitting the disk makes it easier to move the virtual machine to another computer
but may reduce performance with very large disks.

New Virtual Machine Wizard

Ready to Create Virtual Machine

Click Finish to create the virtual machine. Then you can install Windows Server 2019.

The virtual machine will be created with the following settings:

Name:	WinServer 16
Location:	C:\Users\great computer\Documents\Virtual Machine...
Version:	Workstation 17.x
Operating System:	Windows Server 2019
Hard Disk:	40 GB, Split
Memory:	2048 MB
Network Adapter:	NAT
Other Devices:	2 CPU cores, CD/DVD, USB Controller, Printer, Sound...

Customize Hardware...

Windows Setup

Which type of installation do you want?

Upgrade: Install Windows and keep files, settings, and applications
The files, settings, and applications are moved to Windows with this option. This option is only available when a supported version of Windows is already running on the computer.

Custom: Install Windows only (advanced)
The files, settings, and applications aren't moved to Windows with this option. If you want to make changes to partitions and drives, start the computer using the installation disc. We recommend backing up your files before you continue.
